

MARCH 13, 2008

AGENDA ITEM # 12

**INFORMATIONAL PRESENTATION ON NEW MEASURE A CAPITAL PROJECTS:
ROUTE 99 INTERCHANGES AT GRANTLINE ROAD AND SHELDON ROAD**

Action Requested: Receive and file

Key Staff: Brian Williams, Executive Director

Recommendation

Receive and file an informational presentation on interchange reconstruction projects in the City of Elk Grove.

Discussion

Today, we continue an occasional series of informational presentations on **New** Measure A capital projects. City of Elk Grove Public Works staff will provide an overview of their on-going projects to upgrade the Grantline/99 and Sheldon/99 interchanges. These projects entail upgrading two 1950's-era highway interchanges to reflect contemporary design standards and to add capacity to accommodate rapid growth in the City of Elk Grove during the past two decades. Along with the new Folsom Bridge, these are the first **New** Measure A capital projects to go to construction. Approximately, \$22.2 million and \$23.3 million, respectively, are earmarked for these two projects from the **New** Measure A bond anticipation note proceeds.
