

DECEMBER 10, 2009

AGENDA ITEM # **10**

**INFORMATIONAL PRESENTATION ON NEW MEASURE A CAPITAL PROJECT:
CENTRAL GALT INTERCHANGE**

Action Requested: Receive and file

Key Staff: Brian Williams, Executive Director

Recommendation

Receive and file an informational presentation on the City of Galt's project to modernize the Central Galt interchange.

Discussion

Today, we continue an occasional series of informational presentations on **New** Measure A capital projects. City of Galt Public Works staff will provide an overview and status report on the design and pending re-construction of the **Central Galt interchange**. This project will replace and expand an existing interchange on SR 99 to provide sufficient capacity to accommodate projected increases in regional and local traffic and to improve the existing non-standard roadway geometrics.

Almost \$10.5 million is earmarked for this project in the **New** Measure A capital improvement plan. An additional \$352,000 of remaining **Old** Measure A funds will also be spent on the project. The total project cost is estimated to be \$50.6 million, which includes a substantial commitment of City development impact fee revenues. Project completion is scheduled for 2012.

C: Gregg Halladay, City of Galt PW
