

JULY 22, 2010

AGENDA ITEM # 11

**INFORMATIONAL PRESENTATION ON MEASURE A CAPITAL PROJECT:
▪ US 50 BUS/CARPOOL LANES & COMMUNITY ENHANCEMENTS**

Action Requested: Receive and file

Key Staff: Brian Williams, Executive Director

Recommendation

Receive and file a status report on Caltrans' project to design and construct carpool lanes and varied community enhancements in the segment of US 50 between Sunrise Blvd. and Watt Avenue.

Discussion

Today, we continue an occasional series of status reports on Measure A capital projects. Caltrans staff will provide a project description and construction update of the US 50 carpool lanes project. This project involves the extension of bus/carpool lanes in both directions from their current western terminus at Sunrise Blvd. to the Watt Avenue interchange. It also entails an assortment of quality of life enhancements to mitigate the project's impact in adjacent communities.

Over \$37 million is earmarked for this project in the Measure A Capital Allocation Plan. Other funding is derived from the State's Prop. 1B infrastructure bond program.

C: Gary Sidhu, Caltrans-3
