

REVISED

RE: Item #6 STA Board Meeting April 8, 2021

Attached to the staff report for Item #6 are three Capital Allocation and Expenditure Contracts, one of which is for the City of Sacramento.

The contract incorporates a project description (Section 2) which is currently incorrect - it reads: ***Project design, environmental clearance, and construction to restore the historic train station at 5th & I Streets in downtown Sacramento; construct a modern intermodal passenger transfer facility; and integrate the facility with planned adjacent development.***

The correct description is - ***Analysis, coordination, evaluation of alternatives, legal agreements and documents to create a new regional governance structure for the management and expansion of Intermodal Station, including regional rail, light rail, intra-city transit, local transit, and multi-modal connections associated with the Sacramento Valley Station and its facilities.***

During today's meeting we will ask the Board to approve the Contract for the City of Sacramento with the updated language.

Thank you,

Timothy Jones

Sacramento Transportation Authority
